3 Financial performance

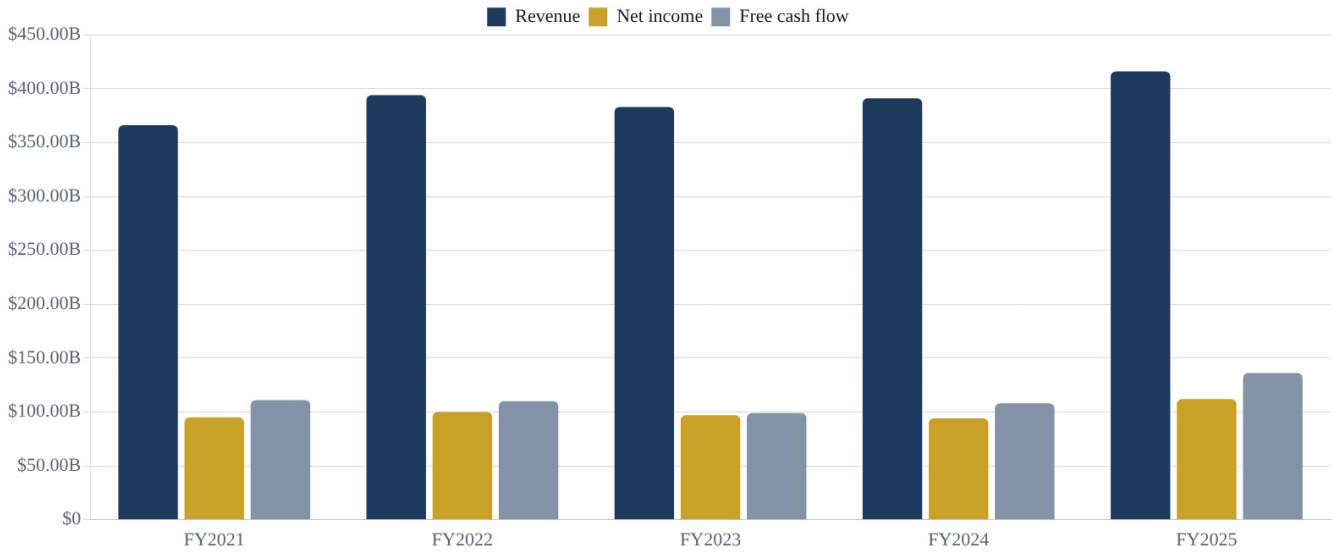

Revenue grew +10.9% in FY2025; 4-year CAGR +3.3%. Net income rose +24.3%, diluted EPS +14.8% - EPS grew slower than profit, meaning new shares diluted owners. Free cash flow fell -4.0%. Latest quarter revenue $25.55B: -1.1% vs the same quarter last year, -3.3% vs the previous quarter (QoQ is affected by seasonality). Latest quarter net income $26.47B (+2.6% YoY).

Revenue, net income and free cash flow (USD)

4 Profitability & returns

Gross margin expanded by 0.6 pp to 46.9%. Revenue grew faster than the direct cost of goods - usually pricing power, a richer product/service mix, scale purchasing or lower input costs. EBITDA margin rose 0.1 pp. Stripping out the gross-margin effect, operating expenses (selling, admin, R&D) cost 0.5 pp - overheads grew faster than revenue (investment in growth, wage inflation, marketing, or falling sales against fixed costs). Net margin rose 2.9 pp. Items below EBITDA (depreciation, interest, tax, one-offs) helped by 2.8 pp - e.g. lower interest cost, a lower tax rate or a one-time gain. Operating leverage this year: EBITDA +5.8% on revenue +10.9% = 0.53x. Profits are growing slower than sales - costs are catching up. Gross-margin range over 5 years: 41.8%-46.9% (volatile - sensitive to costs, pricing or cycle). DuPont: ROE 19.0% ~ net margin 26.9% x asset turnover 1.25x x equity multiplier 0.60x. Driven mainly by high profitability. ROIC of 0.1% is below a typical cost of capital - growth at these returns destroys value.

Margin trends (%)

Ratio	Value	Formula	Assessment

5 Cash-flow analysis

Operating activities

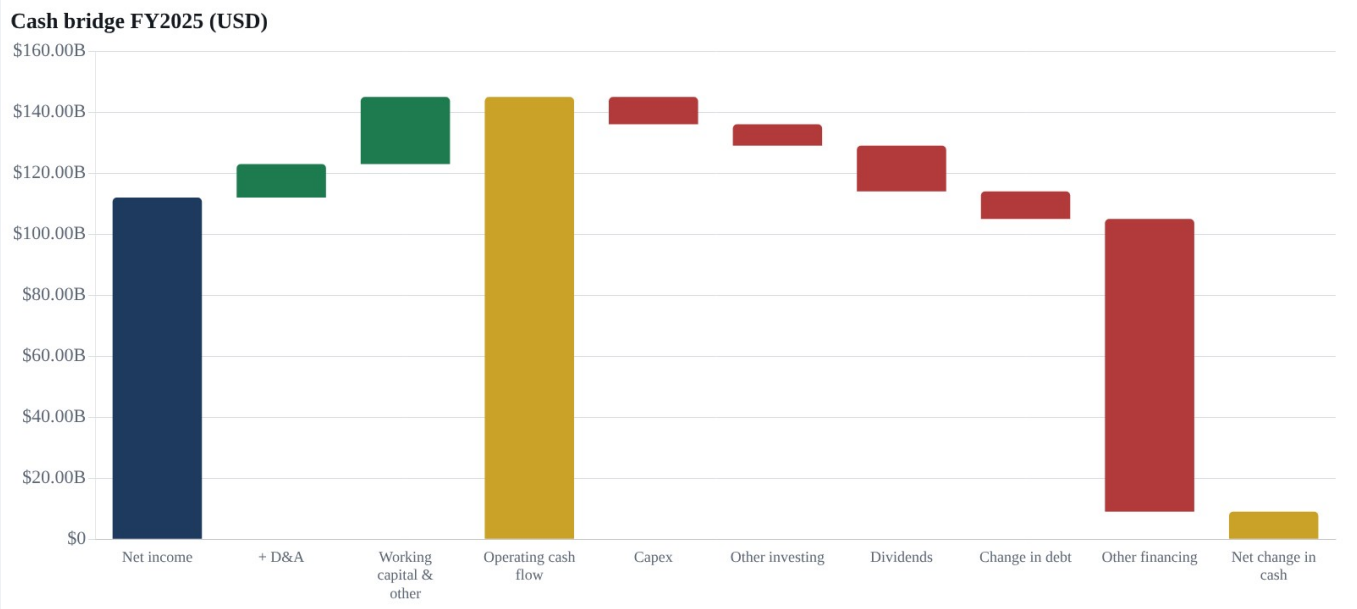

Operating cash flow was positive at $145.00B in FY2025: the core business generated cash. Where it came from: net income of $112.00B; $11.00B of depreciation & amortisation added back (a non-cash charge that reduced profit but not cash); $22.00B released from working capital and other non-cash items (e.g. collecting receivables, paying suppliers later, stock-based pay). Cash conversion (CFO / net income) is 1.29x - profits are well backed by cash. Operating cash flow has been positive in each of the last 5 years, moving from $122.00B to $145.00B.

Investing activities

Investing cash flow was negative at -$16.00B - the company spent cash on its future. This is normal for a healthy firm. Capital expenditure (new plant, equipment, technology) used $9.00B (2.2% of revenue, 6% of operating cash). A further -$7.00B went into acquisitions, investments or securities purchases.

Financing activities

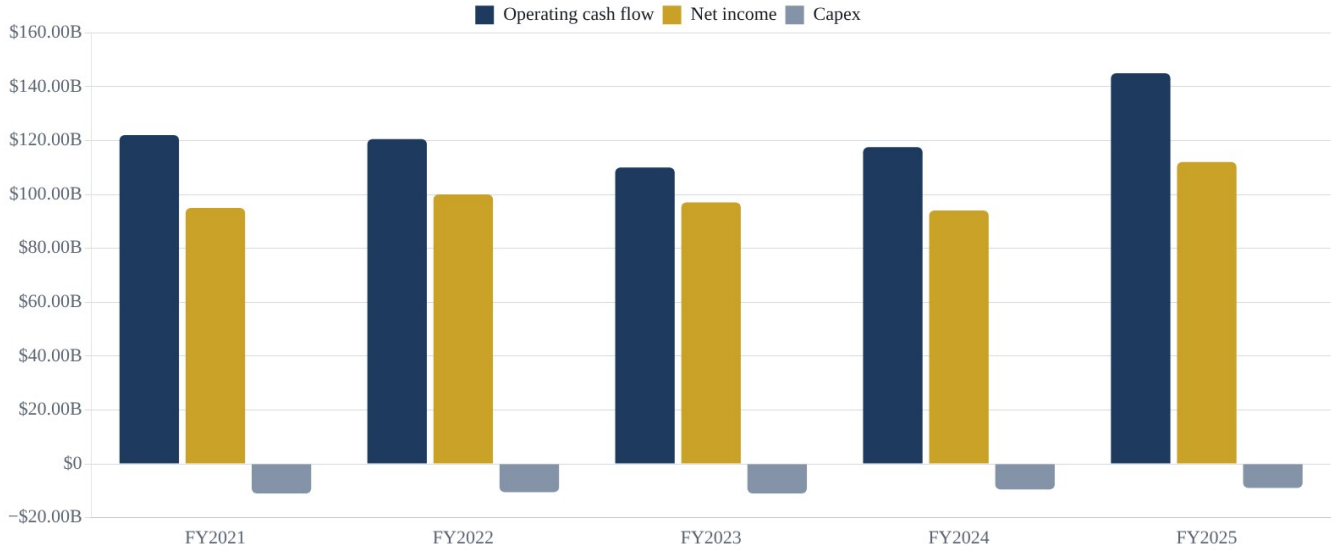

Financing cash flow was negative at -$120.00B - more cash was returned to shareholders and lenders than raised. Main uses: dividends of $15.00B; net share buybacks of about $85.00B (trailing 12 months); debt reduced by $9.00B. Total debt moved from $107.00B to $98.00B over the year. Net change in cash from the three activities: $9.00B (before FX effects).

Cash bridge FY2025	USD	Basis
Net income	$112.00B	reported

12 Conclusion

AAPL Ltd scores 96/100 on financial health (financially strong) and sits in the mature stage of the corporate life cycle. Its main strengths are strong cash conversion (1.29x), low leverage (0.17x ebitda), strong piotroski f-score (8/9). On valuation it trades at 43.3x earnings against a peer median of 38.0x. The price trend is bearish on our technical checklist. Combining these, the disclosed model view is NEUTRAL (59/100).

14 Methodology & data sources

- Derived items: D&A = EBITDA - EBIT; working-capital & other = CFO - net income - D&A; other investing = CFI - capex; other financing = CFF - dividends - chg debt.
- Financial-health score: share of rated ratios passing standard benchmarks (good = 1, neutral = ½, weak = 0), averaged across pillars.
- Model view: 40% financial health, 30% relative P/E vs peer median (50 + (1 - P/E / median) x 60, capped 0-100), 30% technical checklist (50 + 8 x net signals).
- Risk statistics from daily closes: volatility = st. dev. x sqrt252; historical VaR = 5th percentile of daily returns; expected shortfall = mean of returns below it.
